### COURSE DESCRIPTION

This course provides an analytical framework that uses basic economic principles to organize students' thinking about the structure of financial markets, money and capital market, financial institution management, the foreign exchange markets, and the role of monetary policy in the economy.

### LEARNING OUTCOMES

Upon successful completion of the course, students will be able to:

- Assess how monetary activities affect an economy.
- Describe the structure of financial markets, the factors that shape them, and how they are regulated.
- Explain the nature and functions of money and interest rate.
- Explain the role of financial markets in the economy.
- Assess the responses of the economy to both monetary and fiscal policy.
- Explain the basic purposes of the monetary and financial systems.
- Identify the markets for stocks, bonds.
- Explain the roles of banks and other financial intermediaries.
- Discuss the central banking and the conduct of monetary policy.
- Describe the structure of international financial system, the implications, risks, and opportunities of monetary policy in global markets.
- Discuss the role of monetary policy theory on aggregate demand and supply analysis.
